iSWITCH

iSWITCH Universal Wireless Foot Control

Stryker developed a wireless universal footswitch that can eliminate the inconveniences and hazards standard footswitches and cords may create. The footswitch uses a wireless USB connection and has the ability to control the Stryker CORE and SERFAS Energy footswitch functions.

» Completely sealed off from liquids

» Long lasting battery life

RF ABLATION SYSTEM

CROSSFIRE Multiple Options

» The hand-controlled SERFAS Energy Probes offer an ergonomic hand piece with multiple button functions. Each hand piece allows the surgeon to operate the cut and coagulation modes as well as change the power settings. The hand-controlled feature can now fully replace the need for a footswitch.

» The SERFAS Energy System offers both suction and non-suction probes.

» Each disposable SERFAS Energy Probe is designed with an integrated cable, allowing for easy case preparation and clean-up.

» The SERFAS Energy Probes come equipped with a memory chip that contains specific optimized settings for each probe.
